This message is from Chester Water Authority.

The Boil Water Advisory is still in effect for the following areas:

UPPER CHICHESTER, LOWER CHICHESTER, MARCUS HOOK, TWIN OAKS, and Maher Blvd and William Rd in BETHEL TOWNSHIP.

Water service has been restored. It may take some time to get to your home. To help safely return water flow to your home or business, please follow the steps:

Steps to Restore Water Inside Your Home

1. **Turn on Cold Water Slowly**
   - Begin by opening the cold water faucet closest to where the water line enters your building (often a basement or utility sink).
   - Let the water run slowly at first, then gradually increase the flow.
2. **Flush the System**
   - Allow cold water to run for 5–10 minutes or until the water runs clear and free of air.
   - Once cold water is clear, turn on other cold water faucets throughout the home.
3. **Avoid Hot Water Initially**
   - Do not turn on hot water until all cold water lines have been fully flushed.
   - Afterward, you may slowly begin using hot water.
4. **Check Faucet Screens and Appliances**
   - Remove and clean faucet aerators and showerheads, as sediment may collect.
   - Run water through appliances (such as washing machines or dishwashers) only after flushing is complete.

What to Expect

- Temporary **cloudy, milky, or discolored water** may occur and should clear with continued flushing.
- Air in the lines may cause spurting or noise; this is normal and will resolve on its own.

Important Reminders

- If a **boil water advisory** has been issued, continue to follow those instructions until officially lifted.

We will inform you when all corrective actions have been completed and when you no longer need to boil your water.

For more information, please contact the Customer Service Department at 610-876-8181 or 800-793-2323, or www.chesterwater.com.
